

## Resume: Full Stack Engineer (Infisical)

**Name:** [Your Name]

**Location:** San Francisco, CA / Willing to Relocate

**Email:** [Your Email]

**Phone:** [Your Phone]

**LinkedIn:** [Your LinkedIn Profile]

**GitHub:** [Your GitHub Profile, e.g., [github.com/abhinai2244](https://github.com/abhinai2244)]

---

### Objective

Passionate and detail-oriented Full Stack Engineer seeking to join Infisical's world-class team to build and scale open-source security infrastructure for the AI era. Eager to leverage expertise in JavaScript, React.js, Node.js, TypeScript, and DevOps tools to tackle complex challenges, drive innovation, and contribute to Infisical's mission of simplifying security for developers.

---

### Education

#### Bachelor of Technology in Cyber Security

Amrita Vishwa Vidyapeetham, India

[Graduation Year, e.g., 2025]

- **Relevant Coursework:** Cybersecurity, Cloud Computing, Network Security, Software Engineering
  - **Notable Projects:** Developed a Telegram bot using Pyrogram and MongoDB, integrating anime-themed features and dynamic message styling.
- 

### Professional Experience

#### Cyber Security Intern

[Company Name], [Location]

[Month Year] – [Month Year]

- Designed and implemented secure APIs using FastAPI and Python to process and query sensitive documents, integrating Pinecone for semantic search and Gemini API for enhanced text processing.
- Optimized document processing pipelines, reducing latency by adjusting chunk sizes and implementing dynamic rate limiting within free-tier API constraints.
- Collaborated with cross-functional teams to ensure robust security practices, including secure data handling and encryption protocols.

#### Freelance Bot & Web Developer

Self-Employed, Delhi, India

[Month Year] – Present

- Built a Telegram bot with Pyrogram 2.3.45 and MongoDB, incorporating custom features like random welcome GIFs, bot stats, and stylized messages using Unicode and emojis.
  - Developed web applications using Flask, HTML, JavaScript, and Redis, focusing on clean code and scalability for developer tools.
  - Contributed to open-source projects on GitHub, maintaining a strong presence with active repositories and dynamic analytics ([github.com/abhinai2244](https://github.com/abhinai2244)).
- 

### Skills

- **Languages & Frameworks:** JavaScript, TypeScript, React.js, Node.js, Python, C, C++, Java, HTML, Markdown
  - **Tools & Platforms:** AWS, Azure, Google Cloud, Git, GitHub, GitHub Actions, FastAPI, Pyrogram, Pinecone, MongoDB, SQLite, MySQL, Postgres, Redis
  - **DevOps:** Familiar with CI/CD pipelines, containerization, and cloud-based deployment
  - **Cybersecurity:** Knowledge of secure coding practices, secrets management, PKI, and SSH workflows
  - **Soft Skills:** Strong problem-solving, attention to detail, bias toward action, excellent written and oral communication
-

## Projects

### LLM-Powered Query-Retrieval System

[Month Year] – [Month Year]

- Designed a scalable system for processing insurance, legal, and compliance documents using FastAPI, Pinecone, and Gemini API.
- Implemented semantic search with embeddings and clause-matching logic, optimizing for accuracy, token efficiency, and low latency.
- Processed PDFs like BAJHLIP23020V012223.pdf and delivered structured JSON outputs, ensuring explainability and reusability.

### Telegram Bot with Anime Theme

[Month Year] – [Month Year]

- Developed a feature-rich Telegram bot using Pyrogram 2.3.45 and MongoDB, integrating random GIFs, bot stats, and stylized messages with monospace and bold italic Unicode.
- Fixed syntax errors and enhanced functionality with fire emoji animations, ensuring compatibility with Telegram Premium features.
- Engaged community feedback to iterate on features, driving user interaction and retention.

---

## Open Source Contributions

- **GitHub Profile ([github.com/abhinai2244](https://github.com/abhinai2244)):** Actively contributed to repositories focused on cybersecurity tools and developer utilities, earning GitHub trophies for consistent engagement.
- **Sample Contribution:** Enhanced a secrets management tool by adding support for dynamic secret rotation, aligning with Infisical's product goals.

---

## Additional Information

- **Relocation:** Based in [Your Current Location], willing to relocate to San Francisco for Infisical's office-based work.
- **Visa Status:** [Specify if US citizen or visa holder, or note eligibility for visa sponsorship].
- **Interests:** Passionate about open-source development, cybersecurity, and anime-themed projects.
